THE NATIONAL ARBOR CITY AWARDS COMPETITION

DEPARTMENT OF FORESTRY, FISHERIES AND THE ENVIRONMENT

IN PARTNERSHIP WITH

TotalEnergies

THE INSTITUTE OF ENVIRONMENT AND RECREATION MANAGEMENT

SOUTH AFRICAN NATIONAL BIODIVERSITY INSTITUTE

&

THE SOUTH AFRICAN LOCAL GOVERNMENT ASSOCIATION

1. Background and Purpose of the National Arbor City Awards

The Department of Forestry, Fisheries and the Environment (DFFE) established the National Arbor City Awards (NACA) in 2002 in terms of Chapter 4, section 32 of the National Forests Act, 1998 (Act No. 84 of 1998) and in terms of the National Greening Strategy (2006). The NACA are a quest to promote environmental greening and development thereby securing sustainable and healthy living environment for settlement areas in South Africa.

The National Arbor City Awards (NACA) were formed as a partnership initiative between the Department of Forestry, Fisheries and the Environment, TotalEnergies, the Institute for Environment and Recreation Management (IERM), the South African National Biodiversity Institute and the South African Local Government Association, with a purpose to encourage Municipalities to green their areas of jurisdiction.

The NACA competition provides incentives and rewards to Municipalities who are doing their best in terms of greening, especially in townships and new settlement areas. There

are South African Municipalities who are making great strides to expand greening and other landscape developments from the past focus on towns and suburbs to also include townships and new settlements areas. This move has rewarded the latter areas with street trees and recreational parks, some of which have introduced health and fitness facilities.

Polokwane Municipality
–Winner in the 2023
National Arbor City
Awards

1.1 The National Arbor City Awards and Climate Change

It is now a known fact that the world in general is starting to feel the effects of global warming due to climate change. This phenomenon is an environmental threat resulting from emissions of Green House Gases in the atmosphere. All of us will have to face this phenomenon head on by adopting mitigation strategies and adapt our actions towards it. The changes in climate may have significant effects on various sectors globally. Tree planting which forms the basis of NACA is one of the mitigating factors that are

recommended towards the slowing down of this environmental threat. It is for this reason that DFFE is pursuing the NACA together with the National Arbor Month Campaign and the Ten Million Trees Programme. It is acknowledged that tree planting initiatives will have to rely on other supporting programmes such as environmental education and awareness to inform and educate society in general on the importance of trees within the environment, and their role in mitigating environmental threats.

The National Arbor City Awards are conducted in line with the DFFE National Greening Strategy (2006) which defines greening as an integrated approach to the planting, care and management of all vegetation in urban and rural areas, to secure multiple benefits for communities and the citizens in general. Greening is a task that requires multi-disciplinary approaches that include precise scientific knowledge and skills, socio - economic balancing and planning.

1.2 The National Arbor City Awards and The Ten Million Trees Programme

The Presidency of the Republic of South Africa has given a directive for the planting ten million trees. This is an initiative that aims to green our cities, towns, townships and reclaim the degraded areas. The Department has developed a plan which among other issues reflects on the creation of sustainable settlements, addressing household food security, climate amelioration, as well as a contribution towards the provision of recreation facilities for communities in urban and rural areas.

A greater component of the greening function is aligned to the work done by Municipalities, the Department of Human Settlements, Water and Sanitation and various greening organisations. This is a result of the notion that a building without some greenery is not complete in terms of the quest to create sustainable and dignified settlements for our people.

2. Objectives of the National Arbor City Awards

The main objective of the competition is to encourage Municipalities to undertake greening initiatives to create green landscapes. The other objectives include the following:

- To promote the Ten Million Trees Programme
- To promote the development of provincial and local greening plans
- To extend greening in Municipalities to new settlement areas
- To ensure compliance with relevant greening legislations both local and national
- To raise general awareness on the importance and value of trees in residential settlements
- To provide incentives for local authorities that go an extra mile to green their areas of jurisdiction
- To provide a platform for diagnosis of challenges facing Municipalities regarding the greening function and discuss solutions.

3. Summary of criteria for evaluation of the NACA Competition

3.1 The judging criteria focus on the following aspects:

- Greening policy and strategy
- Greening plan
- Conservation and protection of trees
- The municipality concept and implementation plan on advancing the Ten Million Trees Programme
- Future tree planting
- Tree Maintenance
- Tree Administration
- Tree By laws
- Education and awareness on Environmental Greening
- Partnerships in Greening and Environmental Conservation

4. NACA Competition Entries

4.1 Entries for the competition will be handled as follows:

- DFFE National and regional offices will send competition information and requirements to Municipalities
- The IERM will circulate competition information and entry requirements via their network of Municipalities
- Competition information and requirements will be posted on the DFFE and IERM Websites and social media platforms

4.2 Entry requirements for the Metropolitan Municipalities Category are as follows:

- Portfolio of evidence showing mainly: Concept/ Proposal on strategy for the municipality to advance the Ten Million Trees Programme
- Current and future tree planting projects to advance the Ten Million Tree Programme
- Greening policy or strategy, tree register, maintenance plans and budget
- Portfolio of evidence in videos or pictures depicting projects, sites and, special trees
- A narrative not exceeding two pages indicating why the Municipality hopes to be the winner of the National Arbor City Award
- Municipalities must submit entry forms and Poe's electronically using the email addresses in the advert and entry form. Both electronic and hard copy entry forms and POEs will be accepted.

4.3 Entry requirements for the Category B Local Municipalities Category are as follows:

- Portfolio of evidence showing mainly: Concept on strategy for the municipality to advance the Ten Million Trees Programme.
- Current and future tree planting projects to advance the Ten Million Trees Programme

- Greening policy or strategy, tree register, maintenance plans and budget
- Videos or pictures depicting projects, sites, special trees
- A narrative not exceeding two pages indicating why the Municipality hopes to be the winner of the National Arbor City Awards
- Municipalities must submit entry forms and POEs electronically using the email address provided in the advert and entry form. Both electronic and hard copy entry forms and POEs will be accepted.

-

4.4 Entry requirements for Small Rural Local Municipalities Category (municipalities with potential) are as follows:

- Concept on strategy for the municipality to advance the Ten Million Trees Programme
- Current and future tree planting projects to advance the Ten Million Trees Programme
- Evidence showing potential in greening
- A written account of environmental and greening projects by the municipality
- A narrative not exceeding two pages indicating why the Municipality hopes to be the winner of the National Arbor City Awards
- Municipalities must submit entry forms and Poe's electronically using the email addresses provided in the advert and entry form. Both electronic and hard copy entry forms and POEs will be accepted.

4.5 Entry requirements for Youth Participation in Greening Category are as follows:

- Portfolio of evidence showing youth involvement in greening projects
- A written account of environmental and greening projects that involve the youth by the municipality.
- Both electronic and hard copy entry forms and POEs will be accepted.

5. **National Arbor City Awards Competition Adjudication Process**

The evaluation is done based on portfolios of evidence received from Municipalities and the first shortlisting is done. The shortlisted Municipalities are then further evaluated as follows:

- Panel members will visit projects of final shortlisted municipalities to verify PoE's where municipalities are required to prepare a **PowerPoint presentation, Video Clip, Photographs** showcasing greening projects contained in the submitted PoE, this is followed by physical project visits.
- Panel will complete scoring sheets
- An average score will be calculated to determine the winner
- The process is subject to ratification by DFFE Deputy Minister

6. **The evaluation panel will be composed as follows:**

- DFFE (National Office)
- TotalEnergies (Head Office)
- IERM
- SANBI
- SALGA

7. **National Arbor City Awards Ceremony and Prizes**

The National Arbor City Awards Ceremony is combined with the National Arbor Month launch event (which is usually held on 1 September). The mayors of the winning municipalities are invited by DFFE to receive the prizes at the event. Six prizes are awarded: one for the Metropolitan Municipality, three for the category (B) Local Municipality (first, second and third prize), one for Small Rural Local Municipality, and one for Youth Participation in Greening.

8. National Arbor City Awards Competition Feedback

The Municipalities that enter the NACA competition receive written feedback from DFFE after the adjudication process has been concluded. This is conducted to assist municipalities in their future greening projects, and to prepare them for subsequent entries into the competition.
